# Auburn Branch of the South King Tool Library

**JAN/FEB/MAR 2023**

## OVERVIEW

The South King Tool Library (SKTL) is opening a second Tool Library in South King County in 2023. Tool libraries are like regular libraries, but checkout tools instead. Everything from pressure washers, saws, drills, lawnmowers, sewing machines, and so on. SKTL is proud to run the first tool library in South King County, which opened in Spring of 2020. With adaptive programming like Repair Cafes, educational classes, workshops, and recycling events, SKTL has diverted tons of waste and saved residents tons of money. We are an award winning team, acknowledged by our city, county and state. We aim to spread the opportunities tool libraries provide into communities that have the biggest need. Our goal is to empower residents to make the changes they want to see in the world.

## STEPS TODAY

- Develop partnerships
- Secure a location
- Connect with the community

## SPECIFICATIONS

### Partners:

- CBOs, businesses, utilities, institutions, and individuals.
- Environmentally conscious.
- Diversity and service minded
- Connected and diverse representation

## Why an Auburn Tool Library?

- ❖ The Problem (or Opportunity)
  - Tools are expensive and critical to most folks that have a home space (regardless of the size), drive a vehicle (motorized or not), or have business of any sort in the region.
- ❖ Proof the Problem Exists
  - Tool libraries are most effective the closer they are to a community.
  - Community needs vary widely with many factors and conditions.
  - No tool library in Auburn.
- ❖ Additional Problems
  - Home space maintenance of all sizes can be challenging for folks, and we aim to remove as many barriers to that as possible.
  - Lack of resources and information are huge contributing factors to waste. From waste of funds because everyone “needs” to have a lawnmower or drill - to waste that is caused by small problems in the home becoming larger ones.
- ❖ The Basic Solution
  - People should not have to choose between basic needs and life’s expense, and the ability to improve their quality of life by maintaining or improving their homes and possessions.
  - They shouldn’t go into debt to do so either.
- ❖ Your Solution (the Marketing Message)
  - Tool libraries lend tools like a regular library, as well as offering community resources for waste reduction and empowerment.
  - SKTL aims to provide barrierless access to maintain homes of any shape or size, shared spaces like community gardens, greenbelts, pea patches, and parks.
  - Empowering folks to make the changes they want to see in their world.
